

pitchclip Clip-On Tuner

Compact, accurate, and easy to use, **pitchclip** is the discreet, chromatic clip-on tuner that's ideal for guitar

Tuner Highlights:

- Simple, convenient clip-on style chromatic tuner
- New compact, lightweight and discreet design
- Highly accurate and ultra-responsive, offering a wide detection range
- Clear, bright, and easy-to-read LED display
- Display reverse assures easy viewing when mounted on either side of the headstock
- Reliable, highly-stable clip design
- Auto Power-Off extends battery life

Used and loved by players around the world, Korg's clip-on tuners have earned a place as standard equipment for the modern guitarist. The compact, affordable, and easy-to-use pitchclip is the latest addition to the popular Korg clip-on family. Simple and user-friendly, the pitchclip offers highly accurate tuning, fast and ultra-responsive results, and excellent visibility. Pitchclip is *the* choice for every guitar or bass player who desires fast, accurate, and carefree tuning.

Simple, convenient clip-on style tuner

The design goals for pitchclip were simple, convenient features and total ease of use. Clip the tuner to your headstock, flick on the power, and you're ready to tune. As you play a string, the built-in piezo sensor will quickly sense the instrument's vibrations and indicate the pitch in the meter.

Compact, lightweight and discreet design

The tuner and display portion of the pitchclip is extremely compact; the battery compartment has been integrated into the clip itself. The meter display uses a sleek design with no protrusions, which affords a discreet and unobtrusive addition to your instrument. Convenient and lightweight, the pitchclip can be slipped into your pocket or guitar case without adding bulk or taking up valuable space, so you can take it anywhere.

Highly accurate and ultra-responsive, offering a wide detection range

Boasting fast pitch detection and processing, accuracy with ± 1 cent, and a detection range that covers from A0 to C8, the pitchclip outperforms many of the clip-on tuners on the market today. Combined with the affordable price and enhanced display, the pitchclip is remarkable value.

Clear, bright, and easy-to-read LED display

The pitchclip's bright LED display ensures high contrast and a wide angle of visibility; the meter indication remains clear even in dimly lit locations. Adjustable through 120 degrees, the meter/display section can be raised to provide the player with good visibility while tuning in a natural position.

Display reverse mode assures easy viewing

This function conveniently and quickly reverses the meter display, switching top and bottom. This prevents the player from having to view the display information upside down; regardless of whether the tuner is attached to the front or the rear of the headstock. When powering on, simply hold down the power switch for an extended time to reverse the display. Now, the musician is free to choose the position that's most comfortable and convenient; this feature also makes the pitchclip a great choice for left-handed players as well.

Reliable, highly-stable clip design

A newly engineered type of rubber is used in the clip, allowing the reliable attachment to a variety of headstocks; ukulele, electric bass, classical guitar and so on. By relocating the battery compartment to the clip section, the meter display section has been made lighter and slimmer, lowering the overall center of gravity and creating a more secure mounting than ever before.

Auto Power-Off extends battery life

Using a widely-available lithium coin battery (CR2032) provides the pitchclip with a generous 17 hours of operation. The Auto Power-Off function automatically turns the pitchclip off when no sound has been detected for approximately ten minutes, avoiding unnecessary battery consumption.

pitchclip Specifications

Scale: 12-note equal temperament

Range (sine wave): A0 (27.50Hz) – C8 (4186Hz)

Precision: +/-1 cent

Power: CR2032 lithium battery (3V)

Battery life: approximately 17 hours (A4 input)

Dimensions (W x D x H): 52 x 24 x 34 mm/2.05" x 0.94" x 1.34"

Weight: 18 g/0.63 oz. (including battery)

Included items: CR2032 lithium battery (3V) for checking operation

PRICE: £ TBC

AVAILABLE: TBC
